PlexyDesk

A Simple and fast Desktop for the HTC Vision PlexyDesk is an application that is designed to be simple and fast. Instead of being simple and fast, PlexyDesk is meant to be something quite the opposite. Instead of being simple, it is meant to be fast! With a few keystrokes, and a little patience, the same PlexyDesk application that is fast to use in theory, can be made to be slow as the days of the week roll into weeks, months and years. Your Home PlexyDesk is a simple application. Instead of having dozens of menus and windows open, it has one window. Instead of having many unorganized icons and files, it has one icon. PlexyDesk's "home" is a single icon, which displays all of the information you need in order to communicate with your computer, and the rest of the world. A single icon in the middle of the screen, PlexyDesk quickly becomes your constant companion. Your Work At any given time, you can be working on a single file in a few windows. The PlexyDesk application will render each window in a virtual workspace. The virtual workspace is simple and neat. Each virtual workspace is then organized into folders, and each folder is then organized into categories. While you are working in your work, you can have your contacts, your files, your to-do list and more all organized and in one place. It's All about Me It's not really about you. It's about what is on your computer screen at the time, and what information you want to share with the rest of the world. Everytime you touch PlexyDesk, you can become a contributor to the PlexyDesk community. PlexyDesk allows you to share information, and with just a few keystrokes, you can help organize the world. PlexyDesk Tips: Do not stop using PlexyDesk. Use PlexyDesk as if it was your friend. Do not use PlexyDesk as if it was your enemy. Always
